PROFILE

Full-Stack Web Developer specializing in developing fully responsive and scalable web applications with a solid backend logic. Completed NIIT Web Development training as one of the best graduating students, demonstrating rapid technical adaptability and strong foundation across backend and frontend technologies.

Proven track record delivering production-grade web solutions to businesses and individuals at various locations with comprehensive expertise spanning JavaScript, React frontend development, Node.js/Express.js backend development, and MySQL database integration. Strong combination of emerging full-stack web capabilities with web design mastery, enabling end-to-end product delivery from web apps to backend APIs.

TECHNICAL SKILLS

Backend Development
- Languages: JavaScript
- Frameworks: Express.js
- Databases: MySQL, Redis
- Authentication: JWT, OAuth 2.0, Google OAuth
- Queue Management: Asynchronous job processing
- Tools: Postman
- Environment: Node.js

Frontend Web Development
- Frameworks: React.js
- Languages: HTML, CSS, JavaScript
- State Management: Redux Toolkit (RTK), Context API
- Styling: Bootstrap
- Tools: Figma

Cloud
- Platforms: Firebase, Google Cloud Platform (GCP), Railway
- Version Control: Git, GitHub

- Monitoring: Google Analytics

Development Practices

- Agile, Test-Driven Development (TDD), Clean Architecture
- Git workflows, Code reviews, API documentation

PROFESSIONAL EXPERIENCE

Web Developer   July 2023 – Present

- Built and maintained responsive, high-performance websites using modern front-end and back-end technologies.
- Integrated APls, databases, and third-party services to create scalable, Dynamic web applications.
- Optimized site performance, load time, and SEO for improved visibility and user retention
- Collaborated closely with designers and clients to align technical implementation with design goals.
- Wrote clean, maintainable, and well-documented code following best practices and version control standards.
- Deployed and managed web applications across hosting environments, ensuring uptime and security.
- Provided ongoing technical support, troubleshooting, and updates to keep systems running smoothly.
